Welcome Back To Term 3!

This term in Science at HHPS, your little minions will be delving deeper into the laboratory for investigations into Chemical Sciences. Students will be learning about matter, mixtures and how matter can change and behave.

Upcoming Events

- Science Club
Mondays - 1st Break
Location - Galada
- Science incursion -
18th August.
- Science week -
11th-18th August

Prep

In Prep, students will explore materials and matter. They will explore how they have different functions and properties and how they can be used around our school and home.

Vocabulary for this term: *matter, materials, fabric, wool, paper, wood, glass, plastic, metal*

Year 1 & 2

In Year 1 and 2, students will explore matter. They will explore how mixing and physically changing matter in a variety of ways can affect the way we use materials in our daily life.

Vocabulary for this term: *matter, solid, liquid, gases, melting, freezing, changes, mixtures*

Year 3 & 4

Students in Years 3 & 4 will discover the world of chemistry. Students will explore chemical and physical changes of a range of matter. They will also explore how objects are made up of atoms and how their properties and functionality are different.

Vocabulary for this term: *matter, solid, liquid, gas, physical change, chemical change, properties*

YEAR 5 & 6

Students in Years 5 & 6 will discover the world of chemistry. They will distinguish between states of matter, simple and complex mixtures and chemical reactions. Students will delve deeper and gain a greater understanding of the scientific method such as predicting, working scientifically in collaborative groups and organising their findings and reflections.

Vocabulary for this term: *physical changes, chemical changes, irreversible, reversible, rusting, burning, freezing, melting, scientific method*
