

Science Term 1 2023

Biological Sciences

During Term 1 Students will investigate, explore and develop their understanding of living things and the world around them.

Foundation

In the Foundation years students will learn to identify a range of living and non-living things. Students will work collaboratively and conduct hands on experiments

Year 1 & 2

In Years 1 & 2 Students will explore animals features such as characteristics, diet and habitats. Exploring environmental connections on a global scale.

Year 3 & 4

Students in Years 3 & 4 will be delving into the world of biodiversity. Learning about plants and animal functions and classifications

Year 5 & 6

Students in Years 5 & 6 will discover animal and plant adaptations. Learning about plant and animal biodiversity and how they rely on each other.
